SEASONALITY OF PROGRAMS

ALL YEAR ROUND

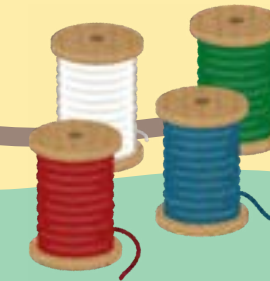

STARTING FROM MARCH

STARTING FROM FEBRUARY

NATURE'S THREADS TO CLOTHING

IDEAL

Primary, Secondary school

A fascinating journey into the world of natural fibres!

A unique programme designed and created
exclusively by Ktima Aristi.

Participating students are exposed to all stages of textile production, discovering
the science and art behind it. They realize that the clothes they wear come from
nature.

Depending on the season of the visit, the students get to know and work with
different materials.

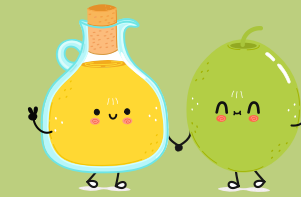

AUTUMN - WINTER | Wool
SPRING | Cotton and linen
SUMMER | Silk

They then take part in specially designed experiential games, and the programme
ends with a customized construction to take home.

OIL PRODUCERS IN ACTION

An unforgettable journey to the world of the olive tree !

Students learn about the fascinating history of the olive, its importance for our health and the varieties of olive products.

A particularly exciting experience is their participation in the traditional olive harvest, where they experience the process as real olive growers.

They learn about the "journey" of the olive from the field to the final packaging, and thus become aware of all aspects of the production of this precious gift of nature.

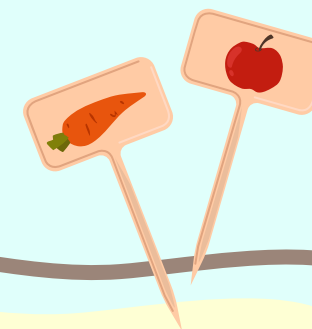

The workshop ends with a fun tasting that they will never forget!

THE PROGRAMME TAKES PLACE
ONLY IN NOVEMBER - LIMITED AVAILABILITY

LITTLE FARMERS

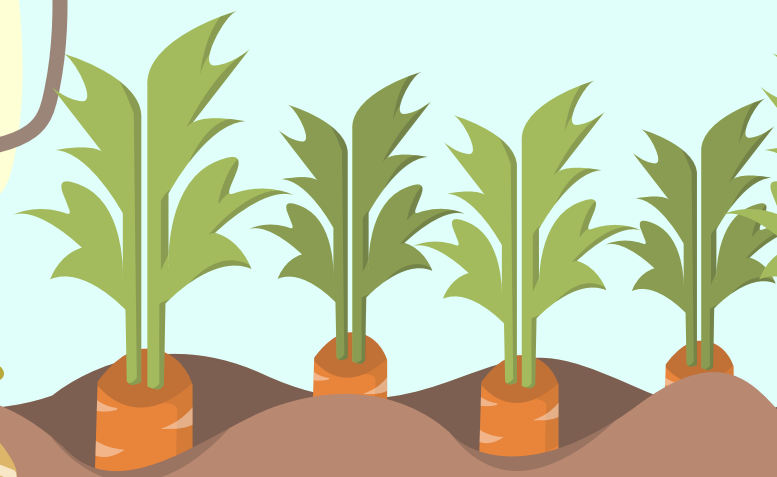

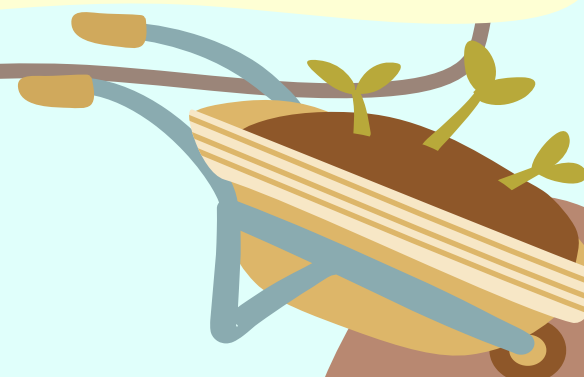

IDEAL

Nursery, Kindergarten,
Primary, Secondary school

Discover the world of agriculture through a unique experience!

Students are guided around the farm, learn the secrets of growing vegetables or aromatic plants and take on the role of little agronomists, creating their own garden.

Through interactive games, students discover the valuable health benefits of vegetables and herbs, while developing a deeper relationship with nature.

ANT NESTS

IDEAL

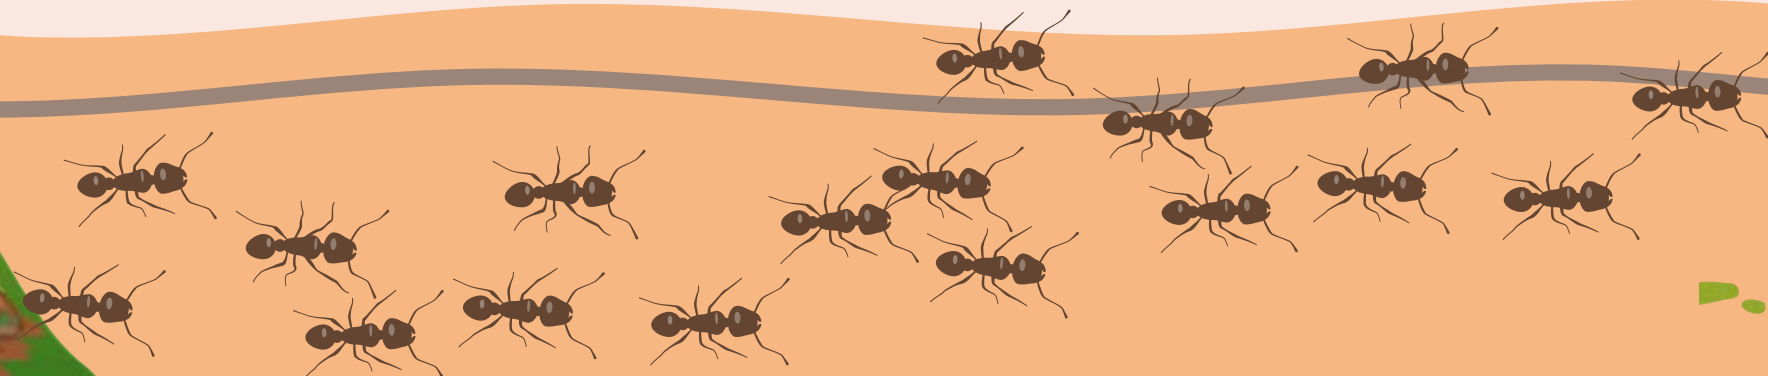

Nursery, Kindergarten,
Primary, Secondary school

A fascinating look at the exciting life of ants!

Students explore the life cycle of ants, their social hierarchy and how they work together as a colony. They observe the ant colony, studying the movements of these unique creatures, and how they build and maintain their tunnels and nests.

Through hands-on exploration, students discover how ants communicate, the process of foraging, and the crucial role of their queen in the growth and stability of the colony.

This program is fun and provides students with an experience they will never forget!

GARDENER COOKS

IDEAL

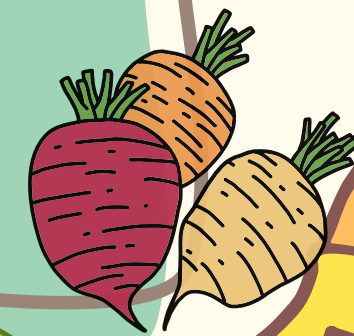

Nursery, Kindergarten,
Primary, Secondary school

Farm to table!

The most delicious educational program!

Students observe the field and the ingredients that grow in it, collect vegetables or herbs from our farm, cook them and turn them into delicious and healthy dishes!

A program that activates the senses. Fresh smells and tastes discovered by the students take them on a journey of discovery !

INSECTS HOTEL

A program dedicated to insects!

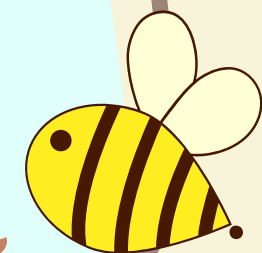

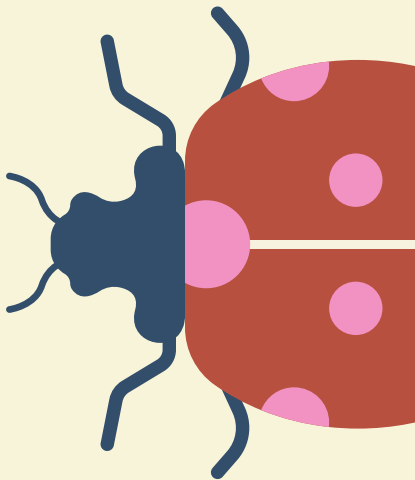

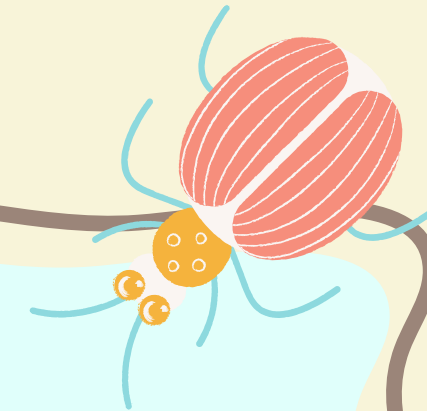

Students discover the essential role of solitary bees and other insects in nature, learning about the life cycle, habits, and importance of these pollinating and beneficial insects.

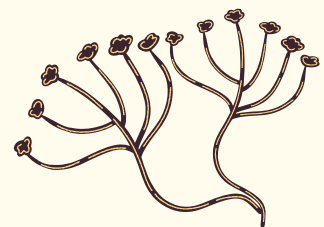

Students become architects themselves as they build their own insect hotels, creating safe spaces for solitary bees and other insects to thrive.

This activity encourages students to protect biodiversity, and to understand the vital connection between insects and healthy ecosystems.

IDEAL

Primary, Secondary school

SENSORY GARDEN

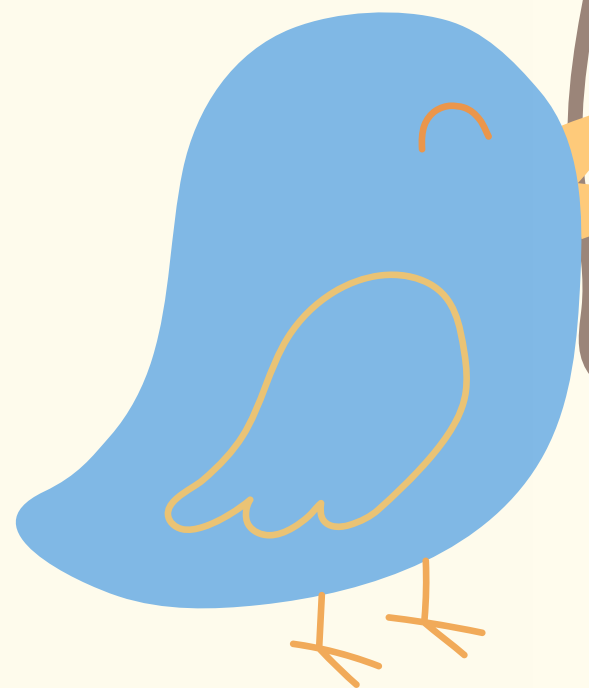

IDEAL

Nursery, Kindergarten

A multi-sensory exploration of a "living" garden!

Through hands-on games, students discover the unique sounds, colors, textures and tastes of different plants.

A walk around the farm, the sounds and textures of nature come to enhance all the students' senses and the program concludes with a tasting that the students do after collecting herbs and fruits from our farm, deepening their connection with nature.

COMPOSTING WITH GEO

IDEAL

Primary, Secondary school

The secrets of composting!

In this program, students explore our living worm farm and learn how earthworms break down organic waste and turn it into nutrient-rich soil.

Through hands-on activities they understand the importance of composting for the environment and the vital role earthworms play in soil conservation.

ZERO
WASTE

COMPOST

MUDFARM

Interactive games and mud cooking!

A special space where students get in touch with nature, discovering earthworms, ants and other small creatures in the soil, stimulating curiosity and observation.

They also create imaginative dishes by mixing soil, water, leaves, rocks, and twigs, encouraging the development of sensory awareness and fine motor skills.

The program ends with each student creating a unique piece of mud art!

IDEAL

Nursery, Kindergarten

DANCERS OF NATURE

The fascinating world of plant sounds and movement!

Did you know that plants make sounds?
A unique educational program... Using a special machine,
students translate the frequencies of plants into melodies by
exploring their hidden vibrations.

In this way, they perceive plants as living organisms while
observing and imitating their extremely subtle movements.

An interactive experience that combines science, music and
movement, allowing students to connect with nature by
participating in a dance journey under the theatrical narration
of the facilitator.
